

TRANSFORMATION OF THE CITY

HOW WILL DATA AND TECHNOLOGY AFFECT NOT ONLY URBAN INFRASTRUCTURE BUT ALSO OUR URBAN EXPERIENCE?

The growing potential of technology in cities is allowing for the development of so-called smart cities. Think things like traffic flow optimization or continuous monitoring of air quality.

We want to know, though, what transformations will cities themselves undergo as things evolve? What will happen to public space as we know it today? During this seminar, six experts explain how they see cities changing from their domain. It appears that this transformation goes far beyond what people might have expected. You won't want to miss their insights!

WE INVITE YOU TO LEARN FROM:

Pieter Ballon
Smart Cities Chair

John Baekelmans
imec

Shenja Van Der Graaf
imec-SMIT, VUB

Mikael Grannas
Mayor of Sipoo
(Finland)

Leo Van Broeck
KU Leuven
Flemish Gov. Architect

Piero Pelizzaro
Chief Resilience Off.
Milan (Italy)

WEDNESDAY
12 JUNE 2019
16:15 - 21:00

CULTUURCENTRUM
MINDERBROERSGANG 5
2800 MECHELEN

NON-MEMBERS €175
MEMBERS €135
< 35 YEARS €75
TEACHERS €37
STUDENTS €10
